

The all-round BACnet building management solution.

Building automation

Open system safety continuous communication with BACnet modularity, products for the field level automation level and management level

Valve and Actuator

VDL-Balancing Valve

UVC-eValveco Energy Valve

Pressure-Temperature Sensor, Switch & transmitter

Dehumidifier

Our broad range of efficient condensation and desiccant industrial and commercial dehumidifiers enables us to offer impartial advice on finding the right drying solution for a variety of applications. Offering complete humidity control, our solutions are either portable, wall-mounted or floor-standing. Discover our range of professional dehumidifiers and speak to an expert today.

Product Type:

- Adsorption Dehumidifiers

Used in environments where they are required humidity values even at low temperatures and constant values dew point very low (up to -60°C).

- Condensing Dehumidifiers

More efficient at medium to high temperatures and under conditions of high relative humidity (greater than 40%).

- Air Conditioning

Portable evaporative coolers provide a versatile and efficient solution for cooling air by exploiting the basic principle of water evaporation

Anywhere that you can use exposed sheet metal ducting, you can achieve savings and design advantages by switching to fabric ducting

The versatility and flexibility of a FabricAir Dispersion System is greater than conventional metal solution

Important Key of **FabricAir** Dispersion System :

- No condensation problems
- Even air distribution
- Fireproof materials
- Excellent sound-technical properties
- Hygienic and easy to maintain
- Faster and cheaper installation than conventional ducting

GENEBRE

At Genebre, we complete the water cycle with people and the planet in mind. Because when it reaches our homes, public or private spaces, we apply solutions to optimize and save both water and energy. Always thinking about achieving maximum efficiency, quality and comfort.

Motor and Gearbox

Motor modules for aluminium and cast-iron motors

The particular advantage of the modular motor range is the facility to add system kits to the standard model, allowing a multitude of useful modules to be adapted to the customer's requirements.

Available motor modules include single and double brake systems, ventilation systems, extended terminal box systems, encoder systems (inside and outside the fan cover), back stops, protection caps, and hand wheel.

WG20 - a new generation of Geared motor

WG20 comprises helical, parallel shaft and helical bevel gear units with torques between 50 and 18,000 Nm. The light aluminium housings of the gear

units up to 600 Nm and the robust cast iron housings from 800 Nm provide a highly versatile and reliable product, with a wide range of possible applications.

CHEMICAL PUMPS SINCE 1992

For over 30 years GemmeCotti has been designing and manufacturing chemical pumps for acids, aggressive and corrosive liquids. The wide range of GemmeCotti products includes magnetic drive centrifugal pumps, mag drive turbine pumps, magnetic drive vane pumps, mechanical seal pumps, vertical pumps and double diaphragm pumps.

The company stands out for the high quality of its pumps for acids, guaranteed by the use of components from Italian suppliers and by the constant commitment of its team to stay up to date in all the most recent technologies.

They always pay special attention to the needs of the customer so as to guarantee continuous and specialized assistance throughout the purchase process.

PCA® 400

Combustion & Emissions Analyzer
for Commercial & Industrial Applications

The MSA Bacharach® PCA® 400 is a handheld versatile combustion and emissions analyzer for commercial and industrial applications.

The analyzer may be configured for up to 4 gas sensors, including O₂, CO, NO, NO₂ and SO₂. The PCA® 400's portable and durable design is ideal for testing, tuning, and maintaining burners, engines, furnaces and variety of other commercial and industrial combustion applications.

- Up to 4 gas sensors for O₂, CO, NO, NO₂ and SO₂
- Wireless Bluetooth® connection to mobile app for real-time combustion measurements and remote operation
- Long life O₂ sensor with 5 year warranty reduces maintenance costs and downtime

Service & Maintenance

We provide installation and service maintenance for equipment in industry. The service is including but not limited to overhaul, repair, installation equipment and utility process.

We also provide audit engineering service to our selected Clients. Energy is crucial and contributes more than 50% portion in total production cost. Therefore, if you can save total energy by improving and optimizing the system process, eventually it will reduce your Operational Cost and at the end can reduce Total Cost in your facility.
